

Jules Mudès

Senior Software Engineer • Paris, France
jules.mudes@email.com • github.com/julesmudes • LinkedIn

Summary

Software engineer with 9+ years of experience building scalable systems and leading technical teams. Deep expertise in distributed systems, cloud architecture, and AI/ML infrastructure. Passionate about building tools that augment human capabilities.

Experience

Lead Software Engineer — Capgemini

Jan 2017 – Present

- Led architecture and development of cloud-native platforms serving 2M+ daily users
- Designed and implemented ML pipelines for real-time recommendation systems
- Mentored team of 8 engineers, established coding standards and CI/CD practices
- Reduced infrastructure costs by 40% through Kubernetes optimization
- Key technologies: Python, TypeScript, Go, AWS, Kubernetes, TensorFlow

Software Engineer — Tech Startup

Jun 2014 – Dec 2016

- Built core backend services handling 50K+ requests/minute
- Implemented real-time data processing pipeline with Kafka and Spark
- Collaborated with product team to ship features on weekly release cycles

Technical Skills

Languages:	Python, TypeScript, Go, Rust, SQL
AI/ML:	PyTorch, TensorFlow, LangChain, Vector DBs, RAG systems
Infrastructure:	AWS, GCP, Kubernetes, Docker, Terraform
Data:	PostgreSQL, Redis, Kafka, Elasticsearch

Notable Projects

- **AI Assistant Platform** — Built multi-agent system with tool-use capabilities, serving 10K+ users
- **Open Source CLI Tool** — 2K+ GitHub stars, featured in popular tech newsletters
- **Real-time Analytics Dashboard** — Sub-second latency for 100M+ events/day

Education

Master's in Computer Science — École Polytechnique

2012 – 2014

Specialization in Distributed Systems and Machine Learning

Languages

French (native) • English (fluent) • Italian (intermediate)
